

7.1.5 Green campus initiatives include

7.1.5.1. The institutional initiatives for greening the campus are as follows:

- Restricted entry of automobiles
- Pedestrian Friendly pathways
- Ban on use of Plastic
- Landscaping with trees and plants

Chalapathi Institute of Pharmaceutical Sciences shows remarkable awareness in maintaining eco-friendly campus. On visiting, one can experience aesthetic and elegant buildings, splendid lawns and lush green environment conducive for teaching – learning process.

Restricted entry of automobiles

The institute encourages the staff and students to use the college transport instead of their own vehicles for safety, security, fuel conservation and reduce environmental pollution. To reduce pollution and disturbance, the parking area for two wheeler and four wheeler is at the entrance of the institute which is far from the academic blocks. Blow the horn is restricted inside the campus for all vehicles is made mandatory. The transport committee of the institution feels responsible to make sure that the buses are regularly checked for pollution by the authorized agency. Also the committee aware the students and staff who own vehicles to have pollution check for their vehicles frequently.

Use of Bicycles

The institute also encourages the staff and students to opt for practicing bicycle as much as possible. The staff and students of the institute also use an application known as “STRAVA” to record their activities of cycling and running. As the application is recognized worldwide, the weekly and monthly enabled challenges in the STRAVA make the participants more enthusiastic and create sustenance in cycling.

The institute also possesses Triathlon CLUB in the STRAVA in the year 2019 to have a record of all activities like running, cycling, swimming, hiking, brisk walking etc. The club stands at 2nd position of all the triathlon clubs with 79 triathletes in surrounding areas of Guntur city.

Chalapathi Nagar LAM, GUNTUR-34

Pedestrian Friendly Pathways

As the campus is vehicle free with some exceptions, the internal roads are used by the pedestrians. As the internal roads are well lined with trees, maintained neatly, the students and staff experience comfort walking.

Ban on Use of Plastic

To restrict the use of plastic, measures have been taken to replace plastic cups and bowls with paper cups. The staff and students are informed to use steel and copper water bottles instead of plastic bottles. Awareness is created among students and staff through orientation and display boards in the premises.

Landscaping with trees and plants

- The institution strongly believes that greenery creates more positivity and peaceful environment for good teaching and learning. Also students' psychological health might benefit by the environment that contains greenery.
- As the institution is imparting pharmacy education, it is richly supported with medicinal gardens around the campus which possess great therapeutic values.
- Also the campus is enriched by the benches which are placed under trees, for the rejuvenation of faculty and students.
