4. Awareness on How to Make Quiz using Quizizz (Youtube Video)

The screenshot displays a Quiz Editor interface. On the left, the 'Question 1' editor shows the text 'Neuron will get signal from its'. Below this, four answer options are listed: 'Axon', 'Dendrites', 'Cell body', and 'Axonal Terminal'. The 'Dendrites' option is marked with a green checkmark, indicating it is the correct answer. To the right of the editor is a preview of the quiz as it will appear on a tablet. The preview shows the same question and options, with 'Dendrites' highlighted in blue. The interface includes a top navigation bar with a 'Publish' button and a bottom status bar showing the time '5:45 / 12:09'.

Jitsi.org video player interface showing a diagram titled "312 The Vascular System". The diagram illustrates the renin-angiotensin mechanism, starting from "Decreased B.P." and showing the conversion of Angiotensinogen to Angiotensin I and then to Angiotensin II. The diagram also shows the role of the Adrenal cortex in producing Aldosterone and the Kidney in producing Renin. The diagram includes a caption: "Figure 13-12. The renin-angiotensin mechanism. Begin at 'Decreased B.P.' and see Table 13-3 for numbered steps. QUESTION: Where is renin produced? What are the functions of angiotensin II?"

The second nervous mechanism involves peripheral resistance, that is, the degree of constriction of the center, which consists of a vasoconstrictor area and a vasodilator area. The vasodilator area may depress the
